

Snow Lake Lithium to produce enough lithium to power up to 5m electric vehicles

160,000 tonnes

of 6% lithium spodumene produced per year

20,000 tonnes

of lithium carbonate equivalent (LCE) will be produced

8kg

lithium on average in every electric vehicle

500,000

electric vehicles can be powered by lithium from Snow Lake Lithium every year

5 million

electric vehicles will be powered by Snow Lake Lithium over 10 years
